

# 1000Pads-Mini XB Board V 1.0

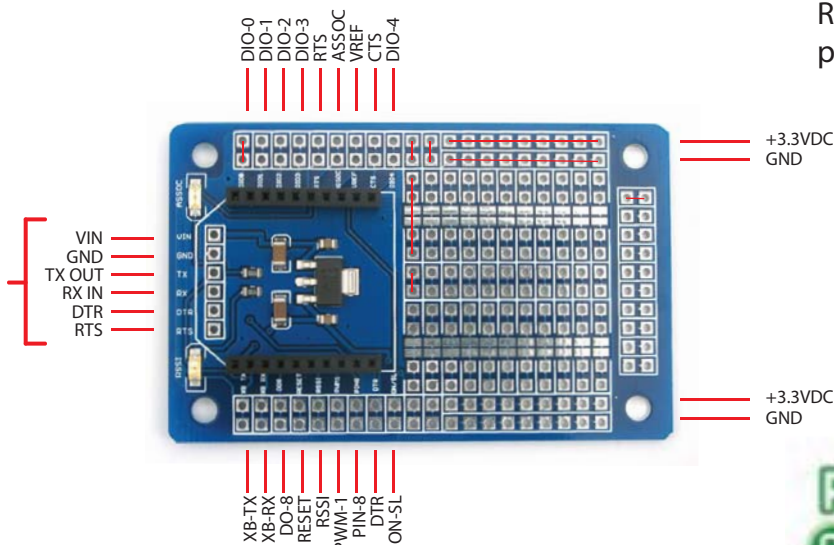

990.102

## Description:

The XB Board has been designed to allow an easy and reliable connection between the Xbee's modules and your application. XBee and XBeePRO modules are fully supported. The rock solid construction and the high power voltage regulator ensure the maximum reliability and full performances of the XBee module.

Two useful LEDs allow constant monitoring of the board activity and fast troubleshooting. All the pins of the XBee are routed out. You can connect the Board in several methods. The SMD pads allows fast wire or SMD component soldering. Better than a Breadboard, faster than a perfboard! You can stack as many boards as your circuit grow up, no limits! The side connectors are useful for routing signals or data outside the board. The pads pitch is standard 2,54mm - The mounting holes are 3.2mm diameter. Dimensions: 43 x 68mm.

easy XBee programming
